

EASTVIEW PARK IMPROVEMENTS

Welcome!

Following Council direction in March 2024, staff have explored options to make disc golf the primary, dedicated use of Eastview Park, while minimizing impacts on other park activities.

We're now seeking your feedback on two concept designs for Eastview Park. Your input will help shape the preferred concept design.

We want to hear from you:

1

Provide your feedback

Review the following presentation boards, ask questions and add your feedback and ideas using the sticky notes provided.

2

Take the survey June 24 – July 13

Scan the QR code to complete the online survey. It will take 5 minutes to complete.

DESIGN PRINCIPLES

The options are guided by four principles, shaped by phase 1 engagement, site analysis and our consultant expertise.

Ensure Safety
and Comfort for
All Visitors

Enhance Trails
& Circulation

Support a
Healthy Forest
Ecology

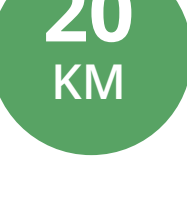

Create a
Thoughtful Disc
Golf Experience

EASTVIEW PARK CONTEXT

Eastview Park is a 6 acre neighbourhood park with wooded walking trails and disc golf, located on the boundary of CNV and DNV.

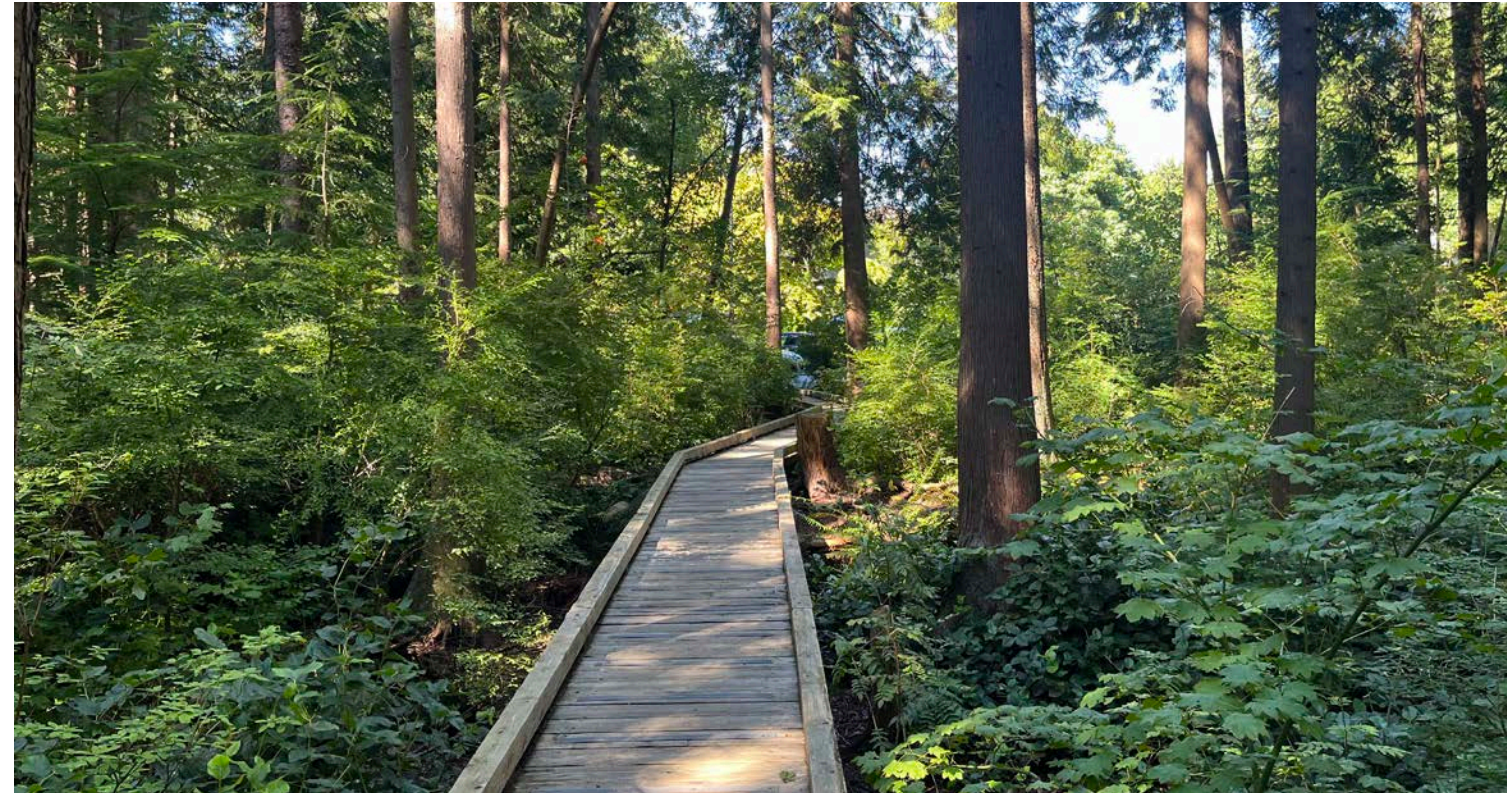

DISC GOLF CONTEXT

There are nine permanent, free disc golf courses in the Lower Mainland, with the five closest being:

-  Eastview Park
North Vancouver, BC
6 Holes (currently)
-  16 KM
Rockridge Secondary School
West Vancouver, BC
9 Holes, restricted hours
-  17 KM
Queen Elizabeth Park
Vancouver, BC
18 Holes
-  20 KM
Quilchena Park
Vancouver, BC
12 Holes
-  20 KM
Jericho Park
Vancouver, BC
17 Holes, restricted hours
-  22 KM
Robert Burnaby Park
Burnaby, BC
10 Holes

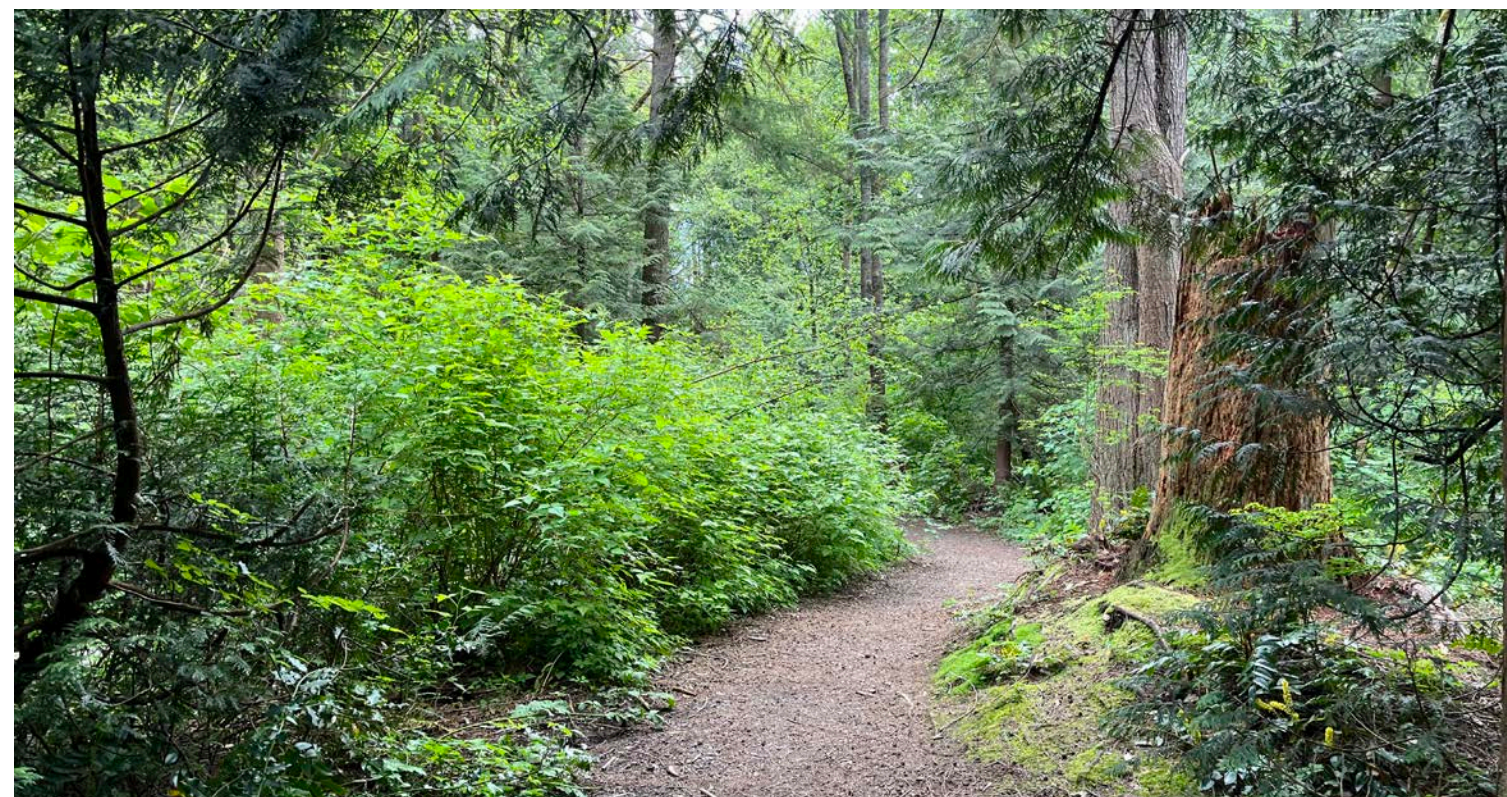

EXISTING CONDITIONS

Eastview Park offers quiet spaces and access to nature.

There is limited seating in the park.

The trail network is informal and accessibility varies.

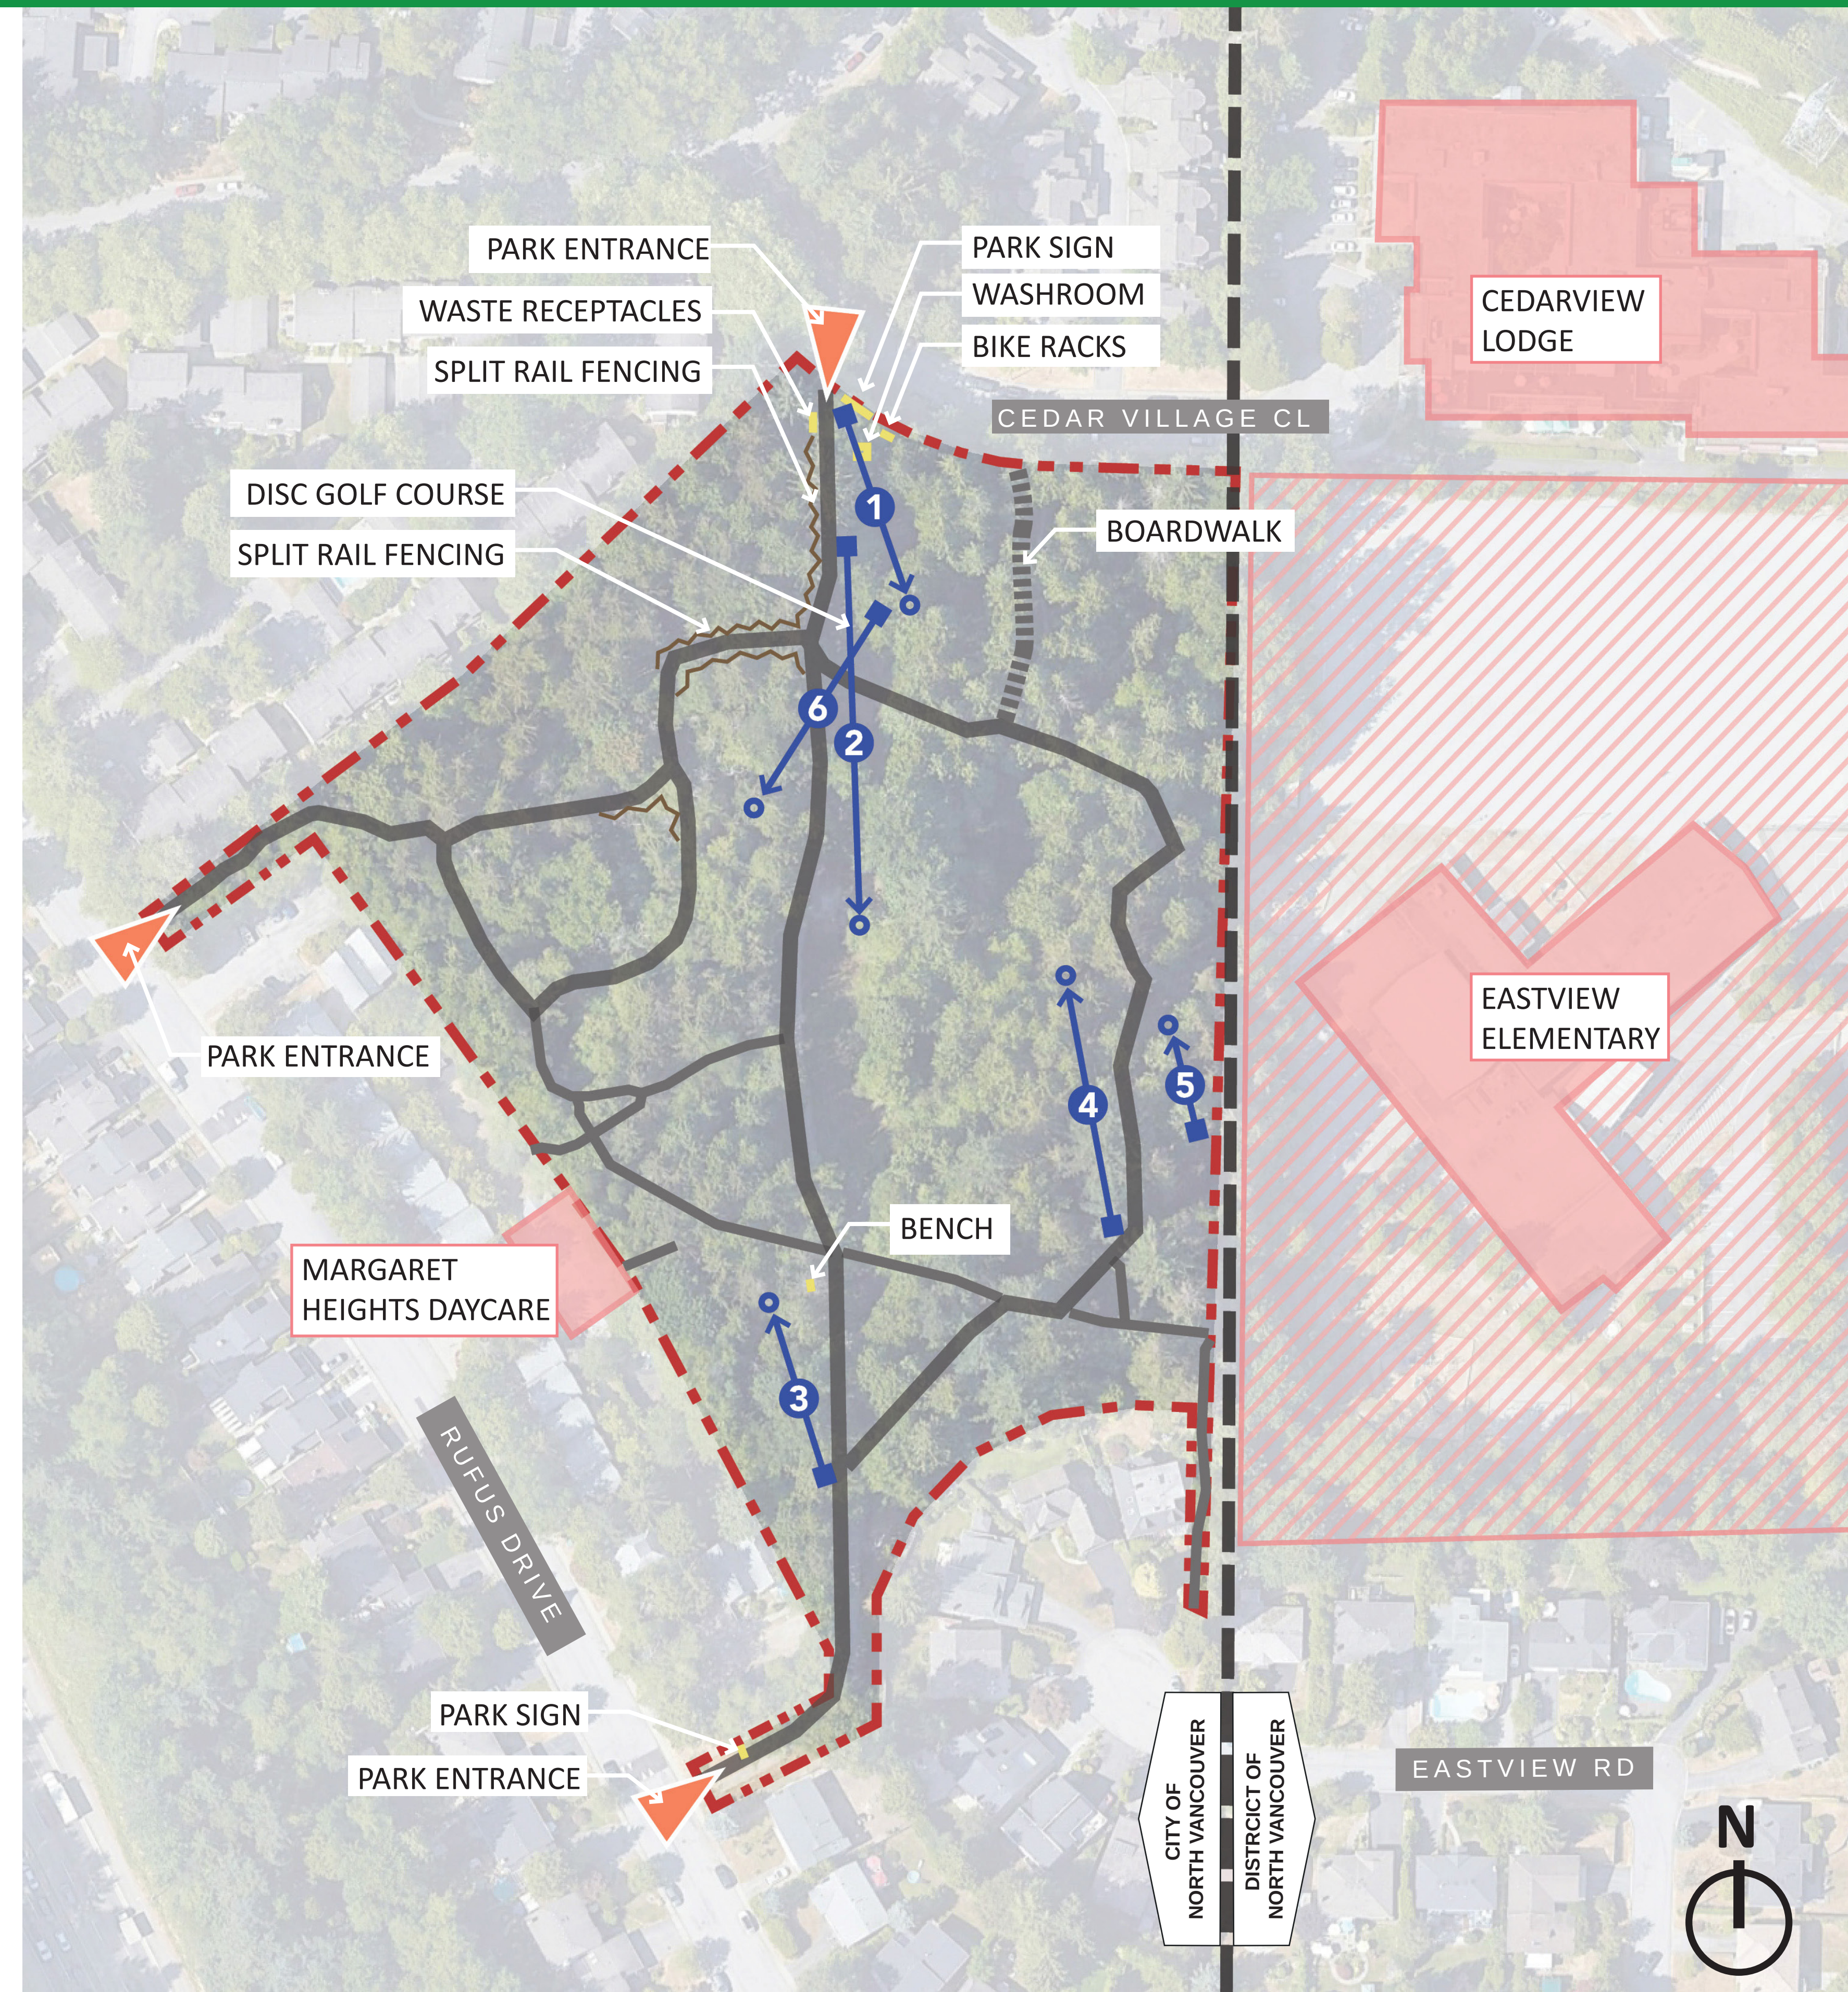

Park trails are well used and part of larger neighbourhood networks.

Areas of the forest understory have been impacted by heavy use, and invasive species are found around the park.

Disc golf course is only 6 holes and the layout crosses pathways, raising safety concerns.

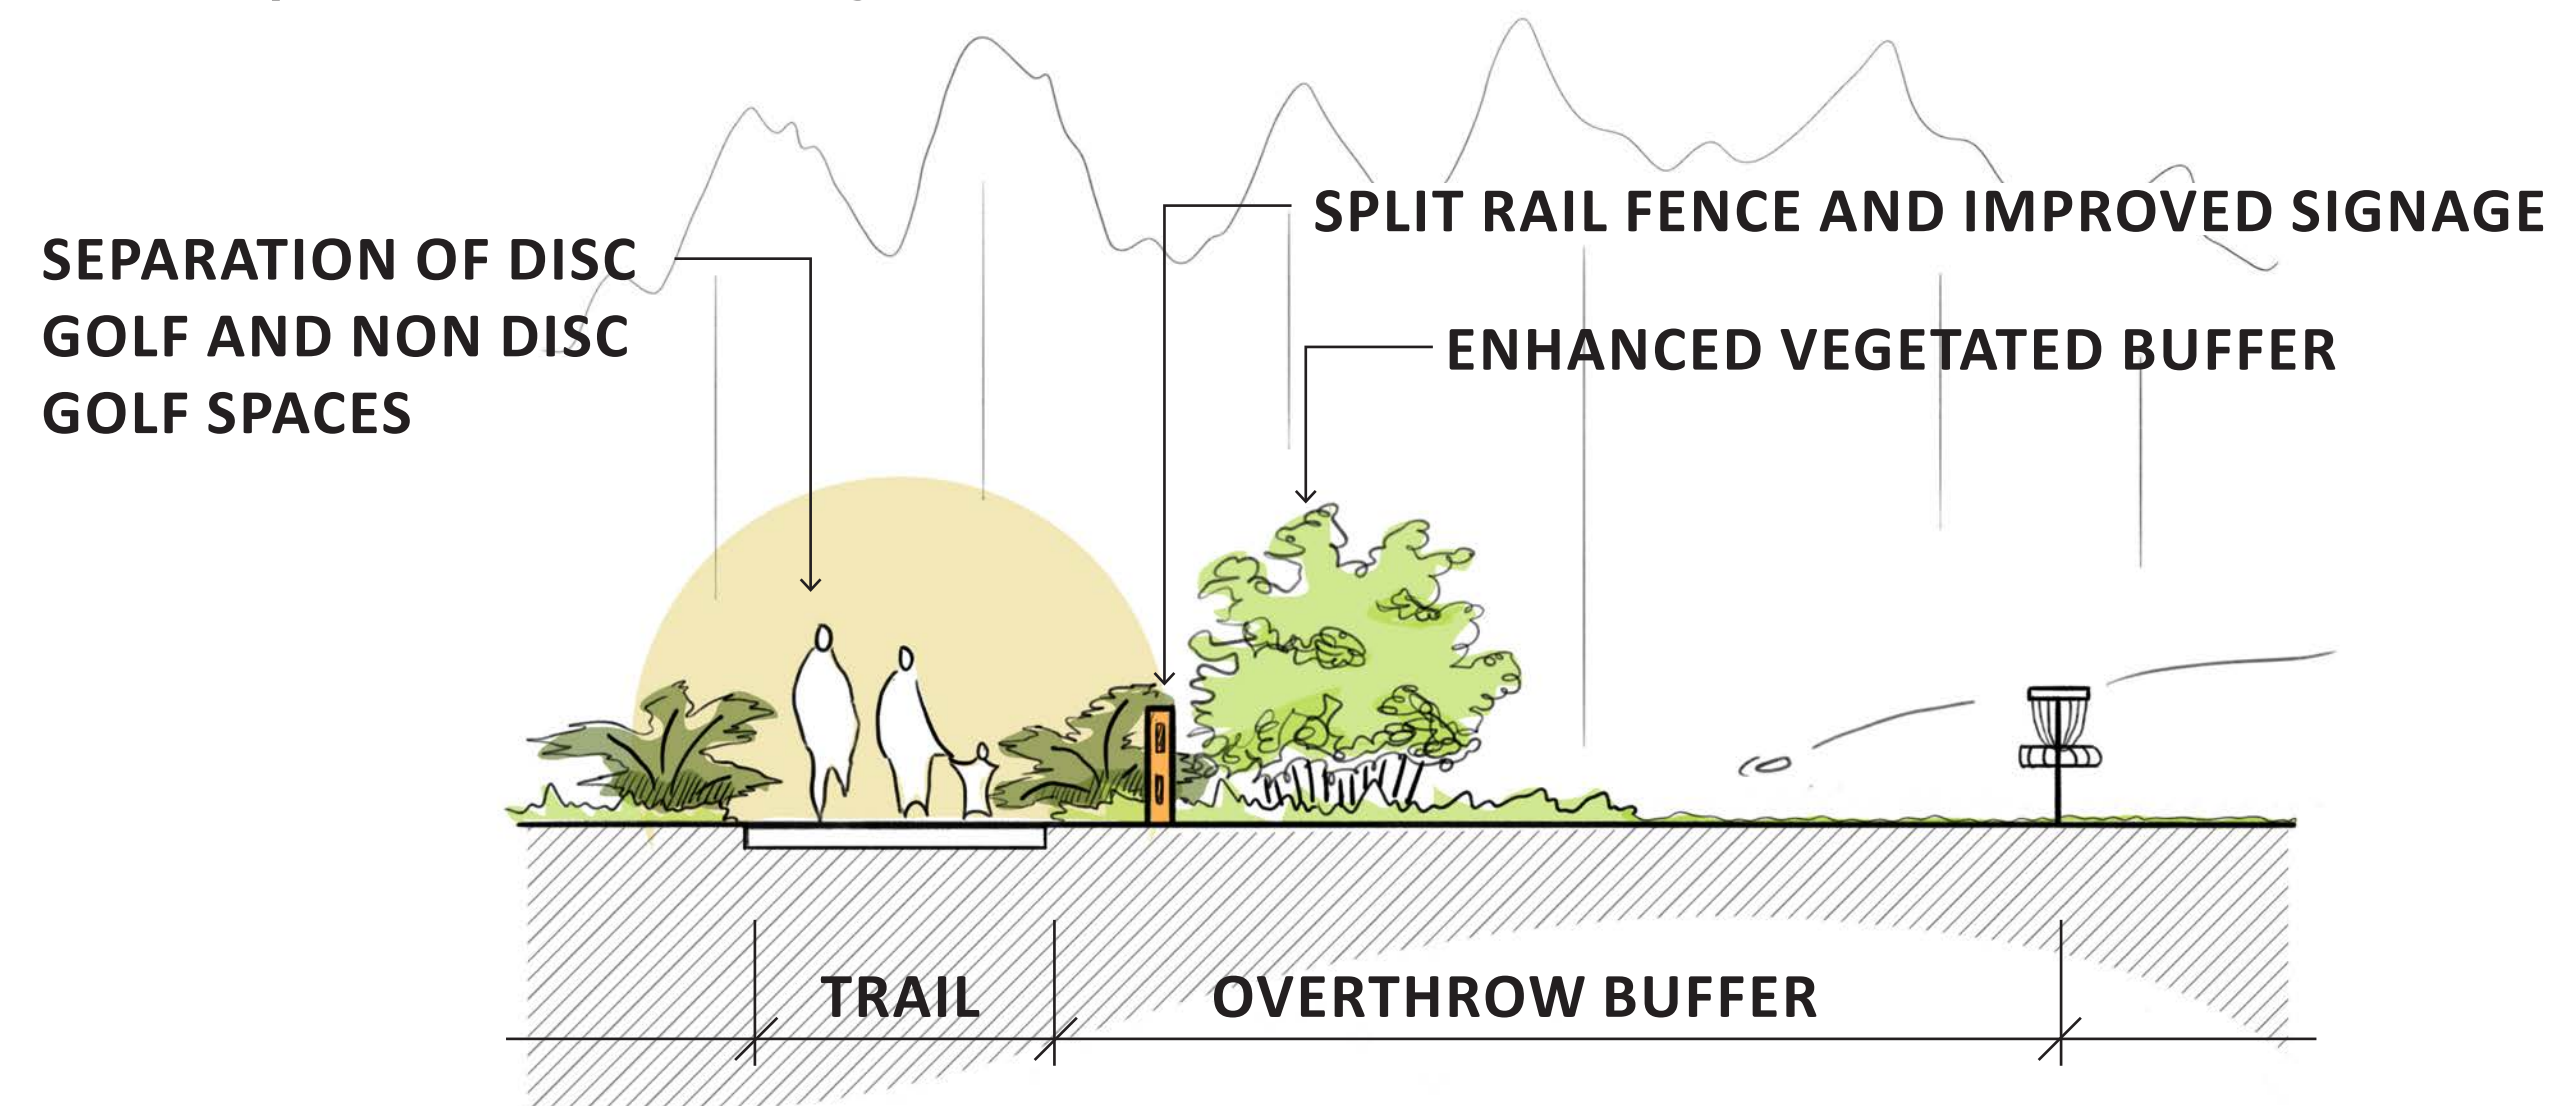

EASTVIEW PARK IMPROVEMENTS

DESIGN PRINCIPLES AND STRATEGIES

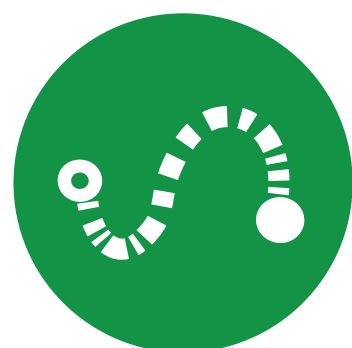

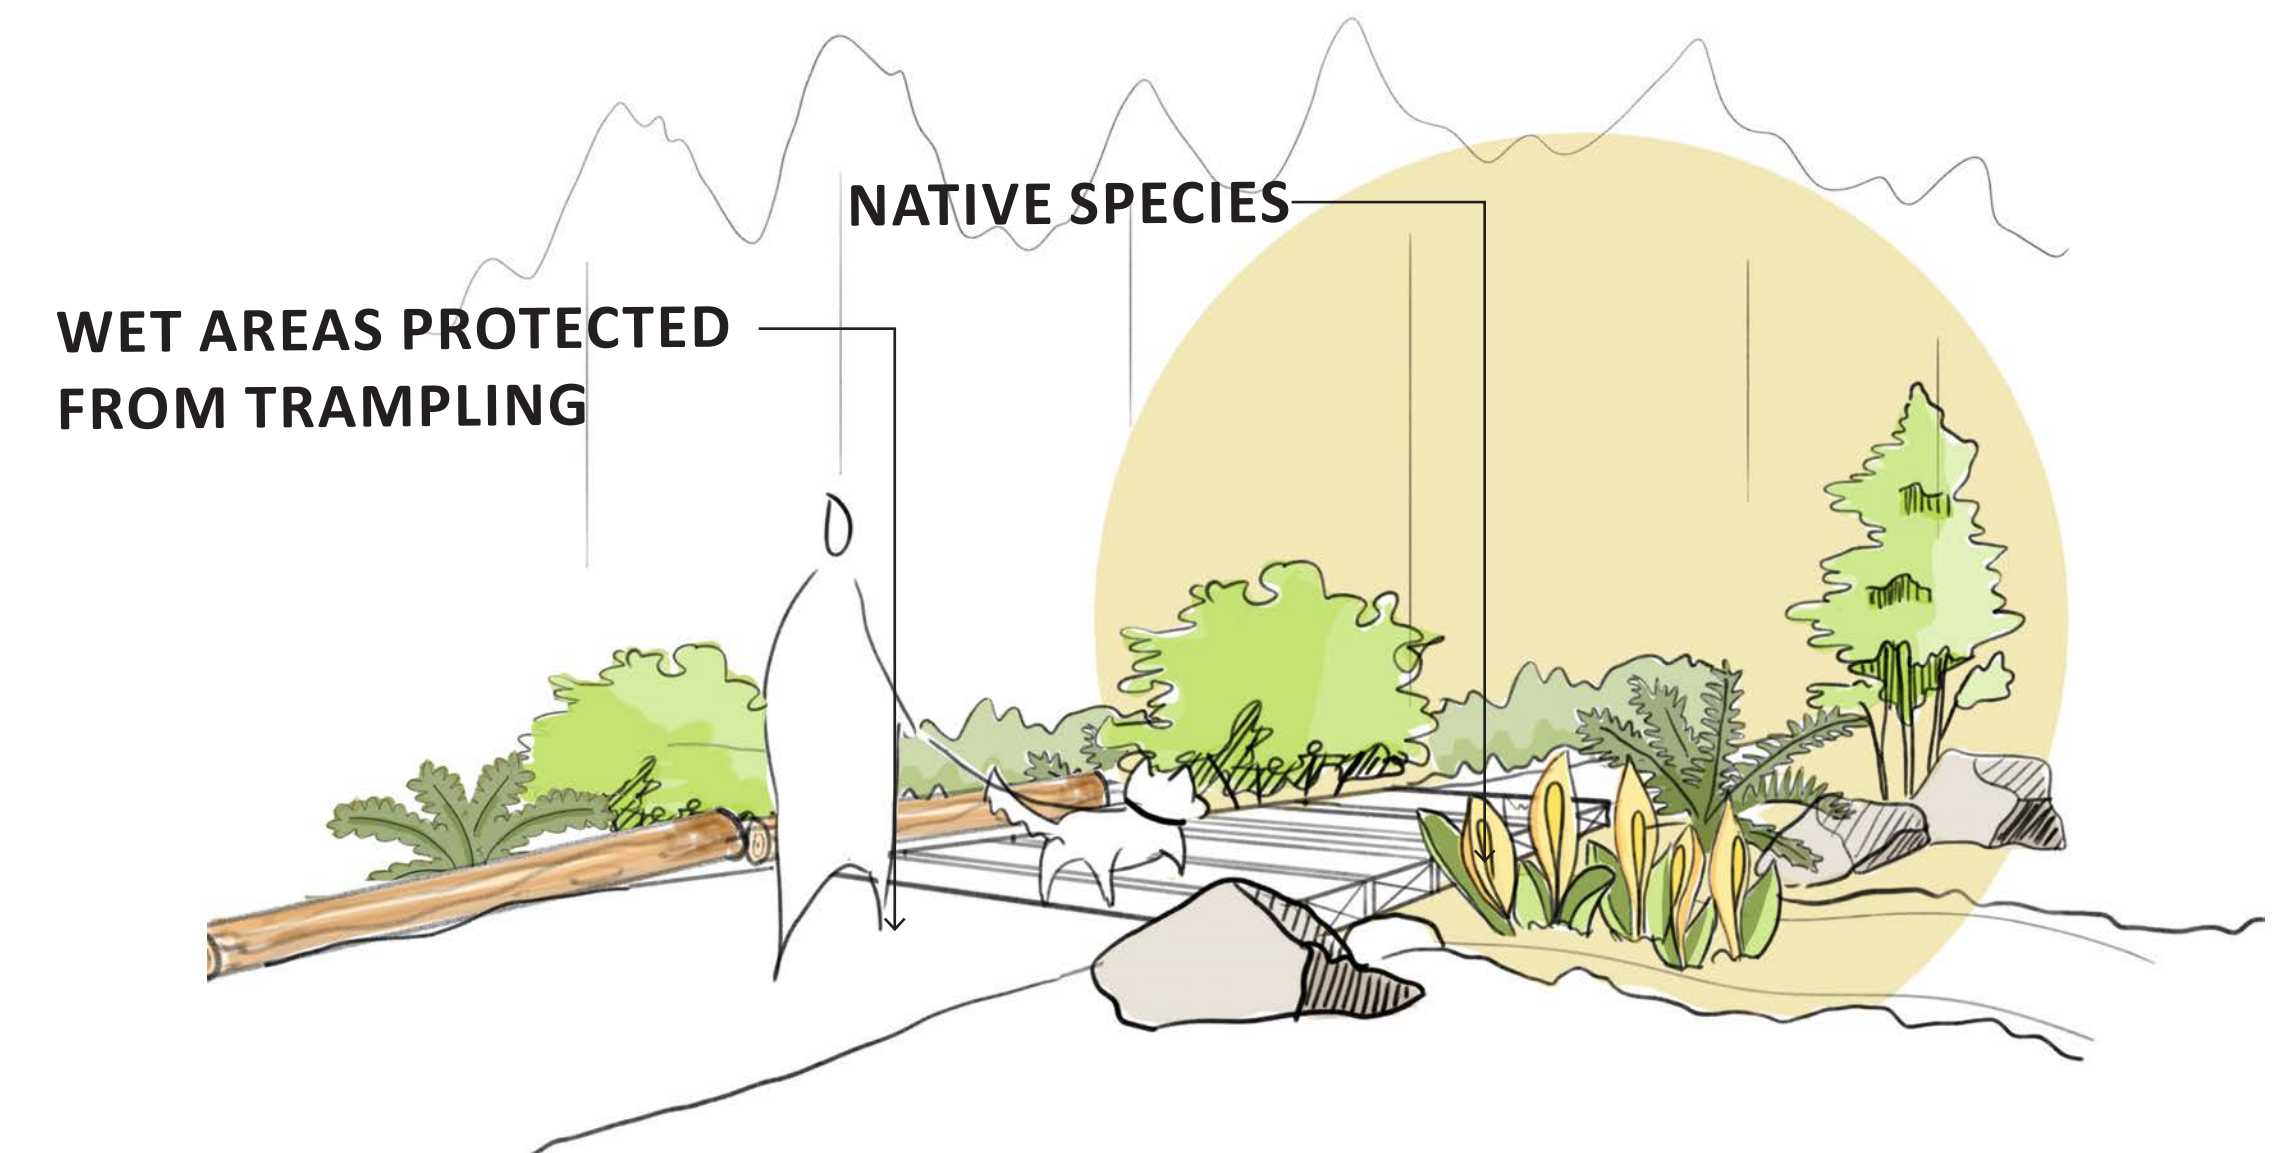

ENSURE SAFETY AND COMFORT FOR ALL VISITORS

Design the park to be a welcoming and secure space for everyone.

SUPPORT A HEALTHY FOREST ECOLOGY

Protect and restore natural areas for long-term environmental health.

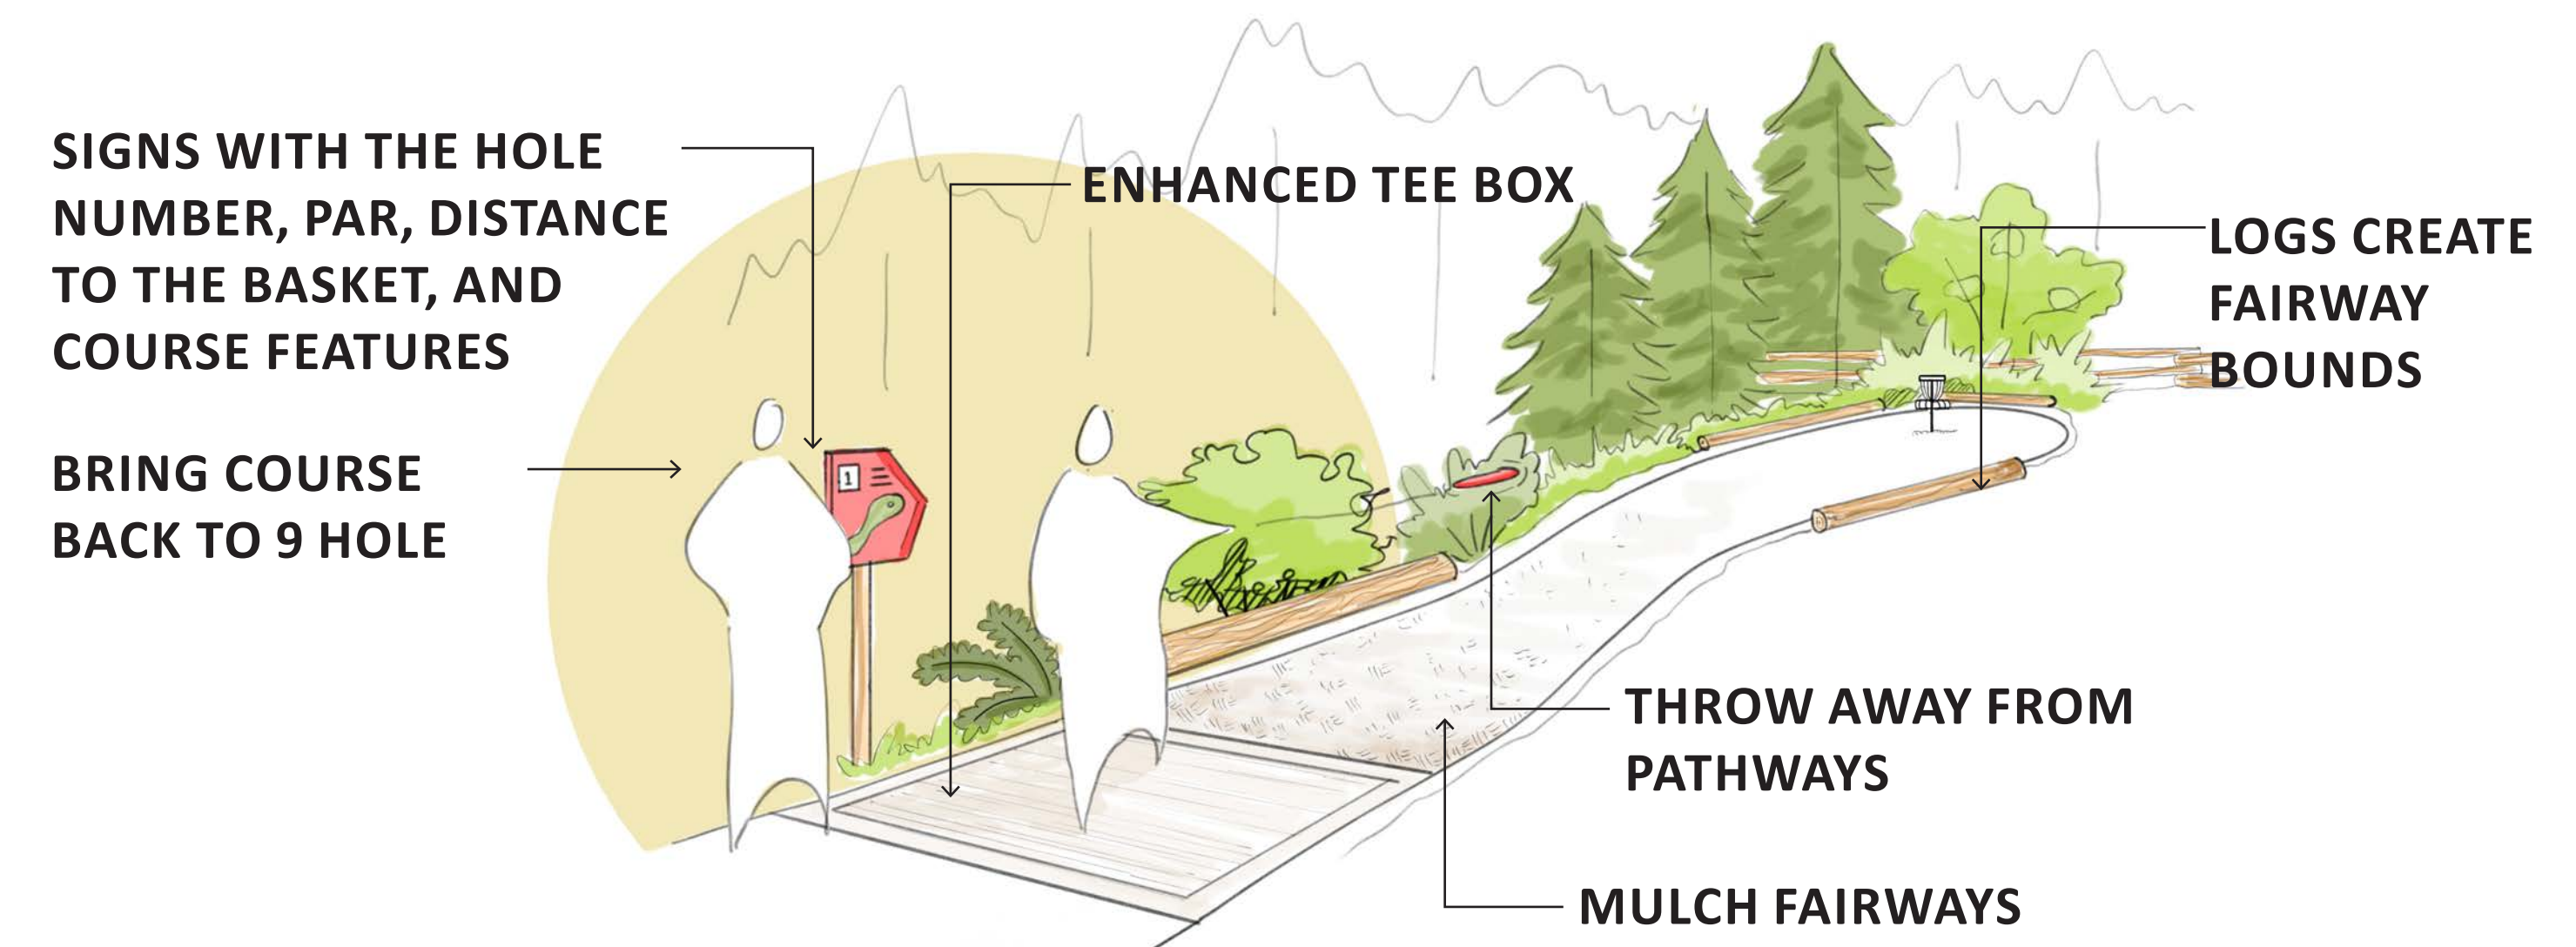

ENHANCE TRAILS AND CIRCULATION

Improve wayfinding, pathways, and park connectivity.

CREATE A THOUGHTFUL NEIGHBOURHOOD DISC GOLF EXPERIENCE

Design a course that is both challenging and enjoyable while respecting other park uses.

DESIGN OPTION 1: HUB

The Hub Concept features a central gathering space connected by a main pathway, with the disc golf course divided into smaller sections distributed throughout the park.

Some main features of this concept include:

Fencing and planting creates a buffer between the disc golf course and other park uses. The hub is a space to sit and gather in the central clearing of the park.

The central pathway is maintained through the park with east and west connections.

Continued restoration throughout the park with opportunities for pockets of restoration planting buffering the fairways and baskets.

The disc golf course is divided into two main sections by the central pathway. Players will use mulch pathways from the tee pad to the basket, and the park pathways to move between sections.

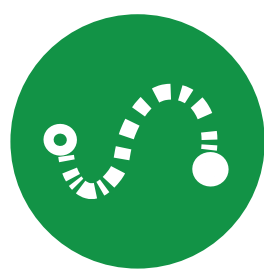

DESIGN OPTION 2: LOOP

The Loop Concept features a small gathering area at the north entrance, a forested loop trail around the park, and a centrally located disc golf course.

Some main features of this concept include:

Fencing and planting buffers between the disc golf course area and other park uses. The north entrance will be enhanced as a welcoming entry with seating.

The main circulation is a forested loop trail around the park. Shortcuts through the park may require entering into the disc golf course.

Restoration opportunities are focused on the edges of the park with pockets of restoration planting added within the disc golf course.

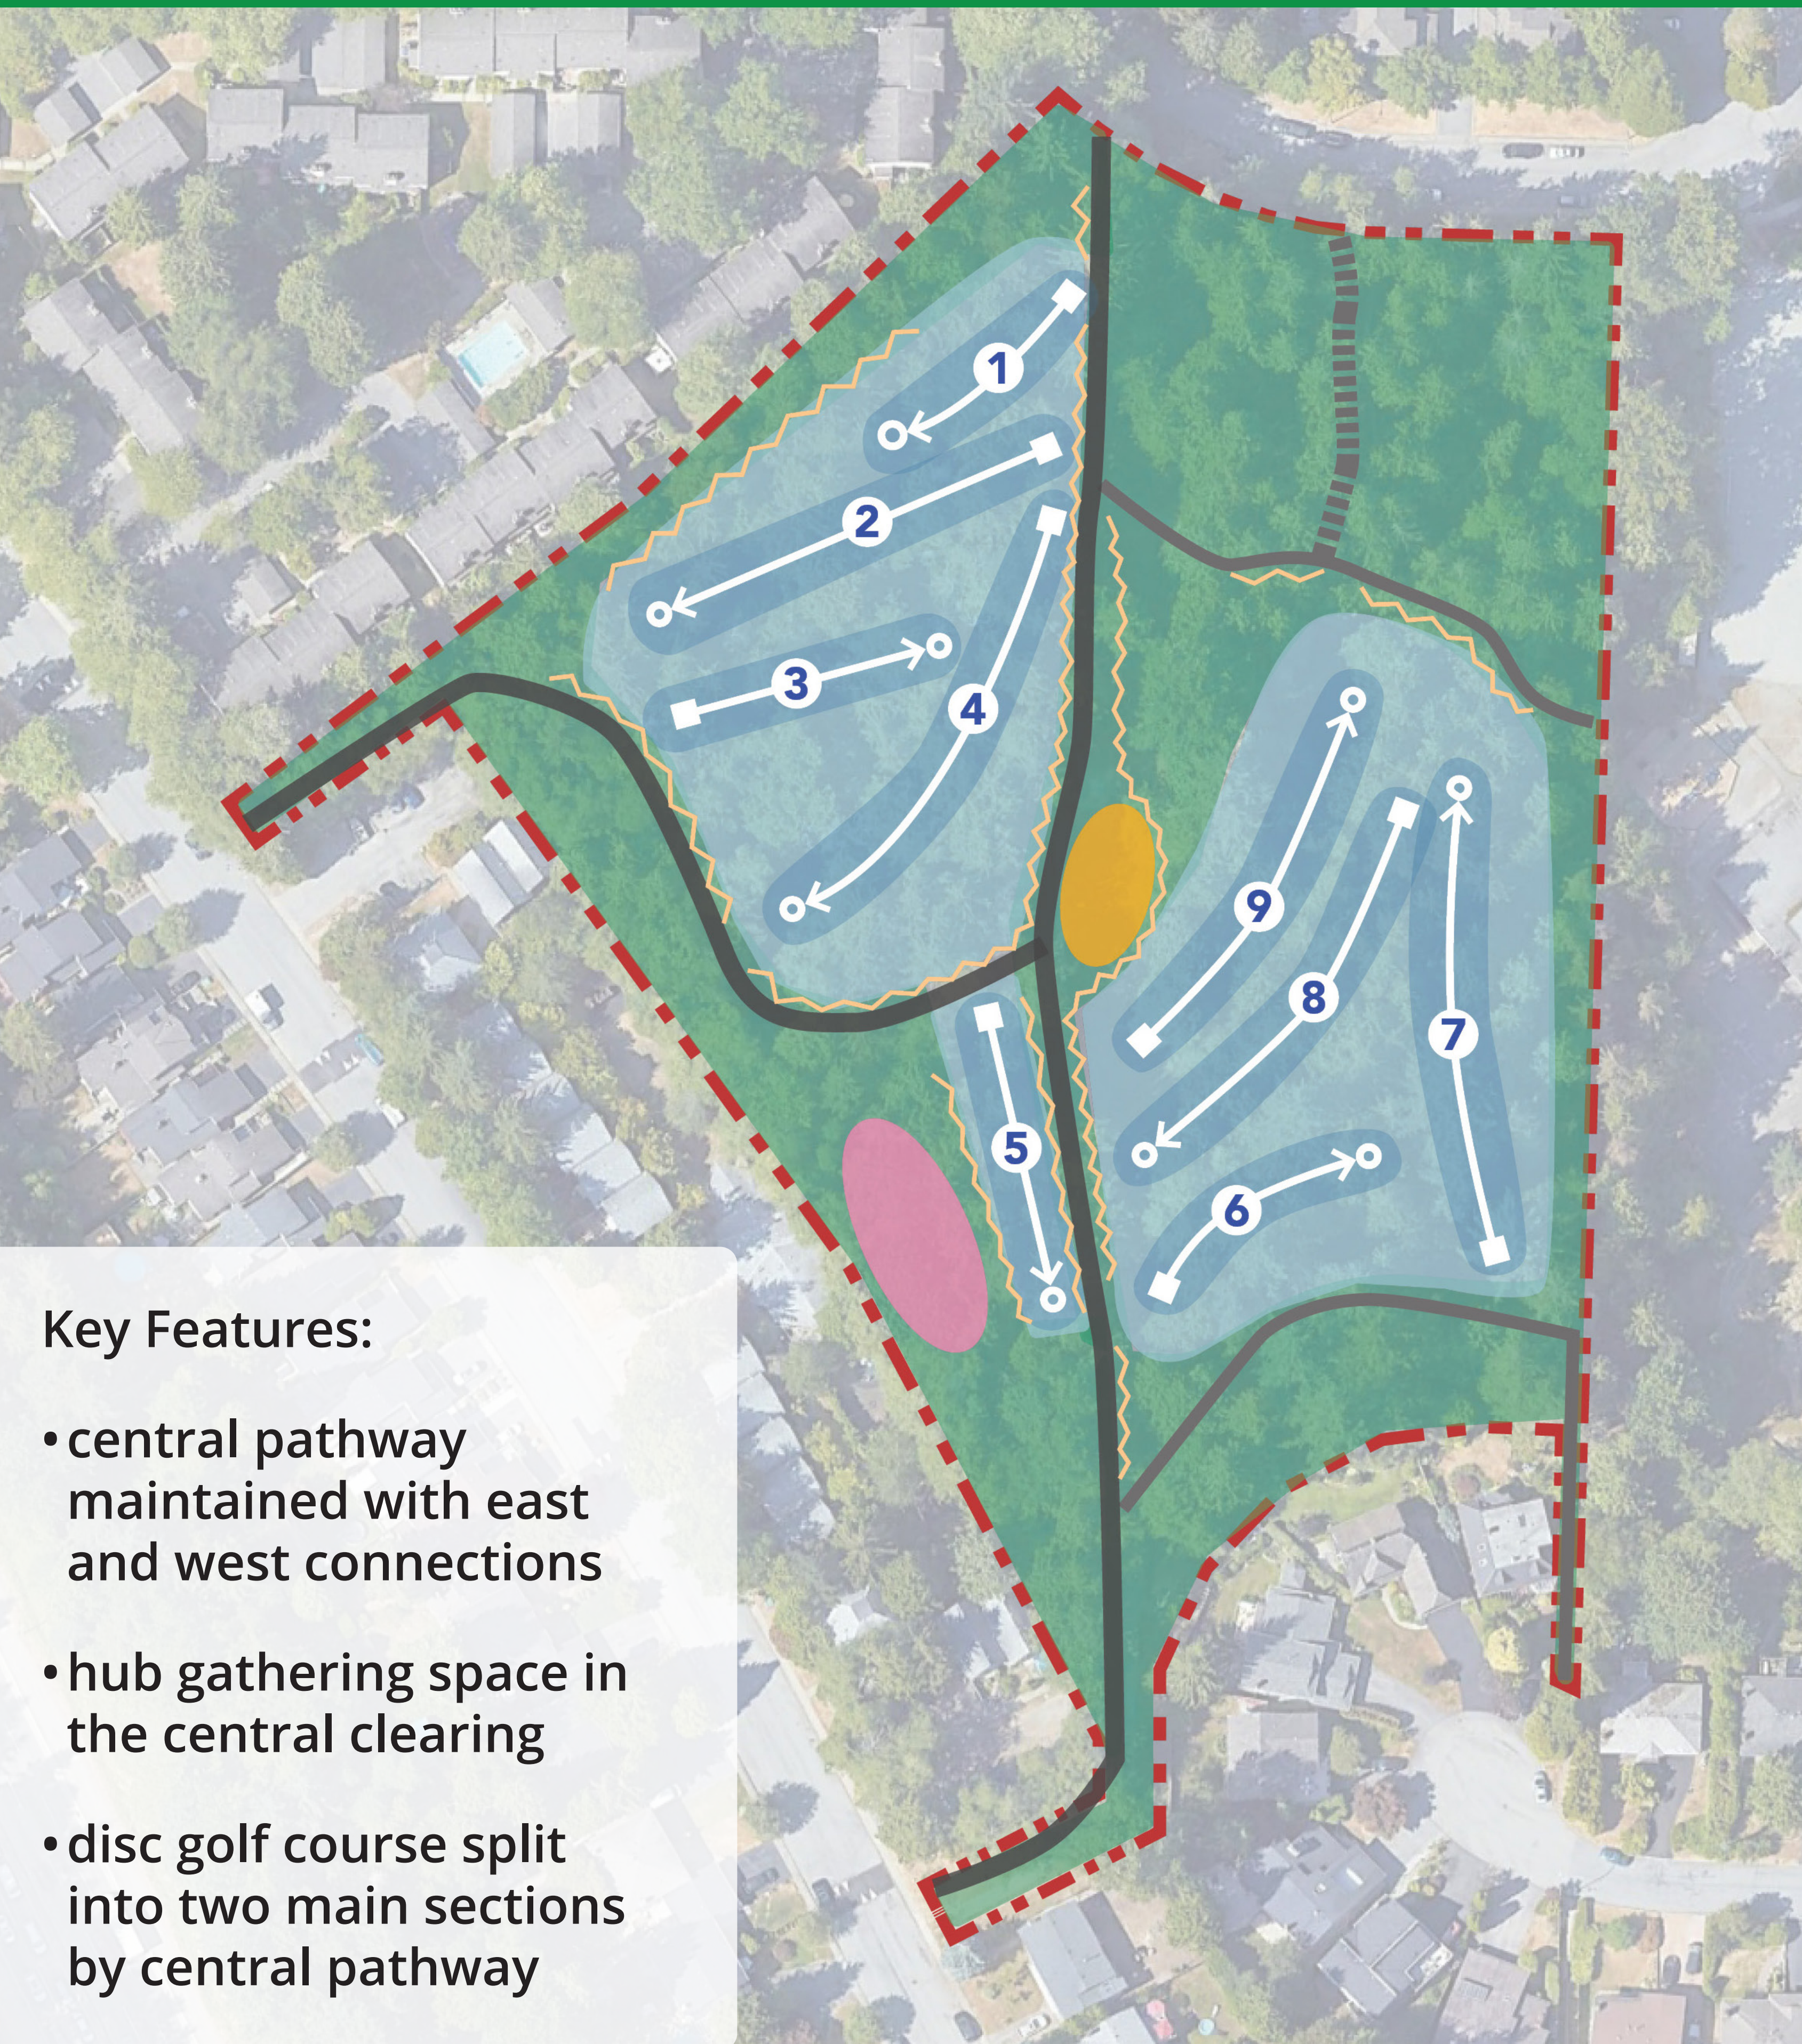

The disc golf course is in one central area. Players will use mulch pathways to move throughout the course.

PROVIDE FEEDBACK: HUB

What do you like about the Hub?

What don't you like?

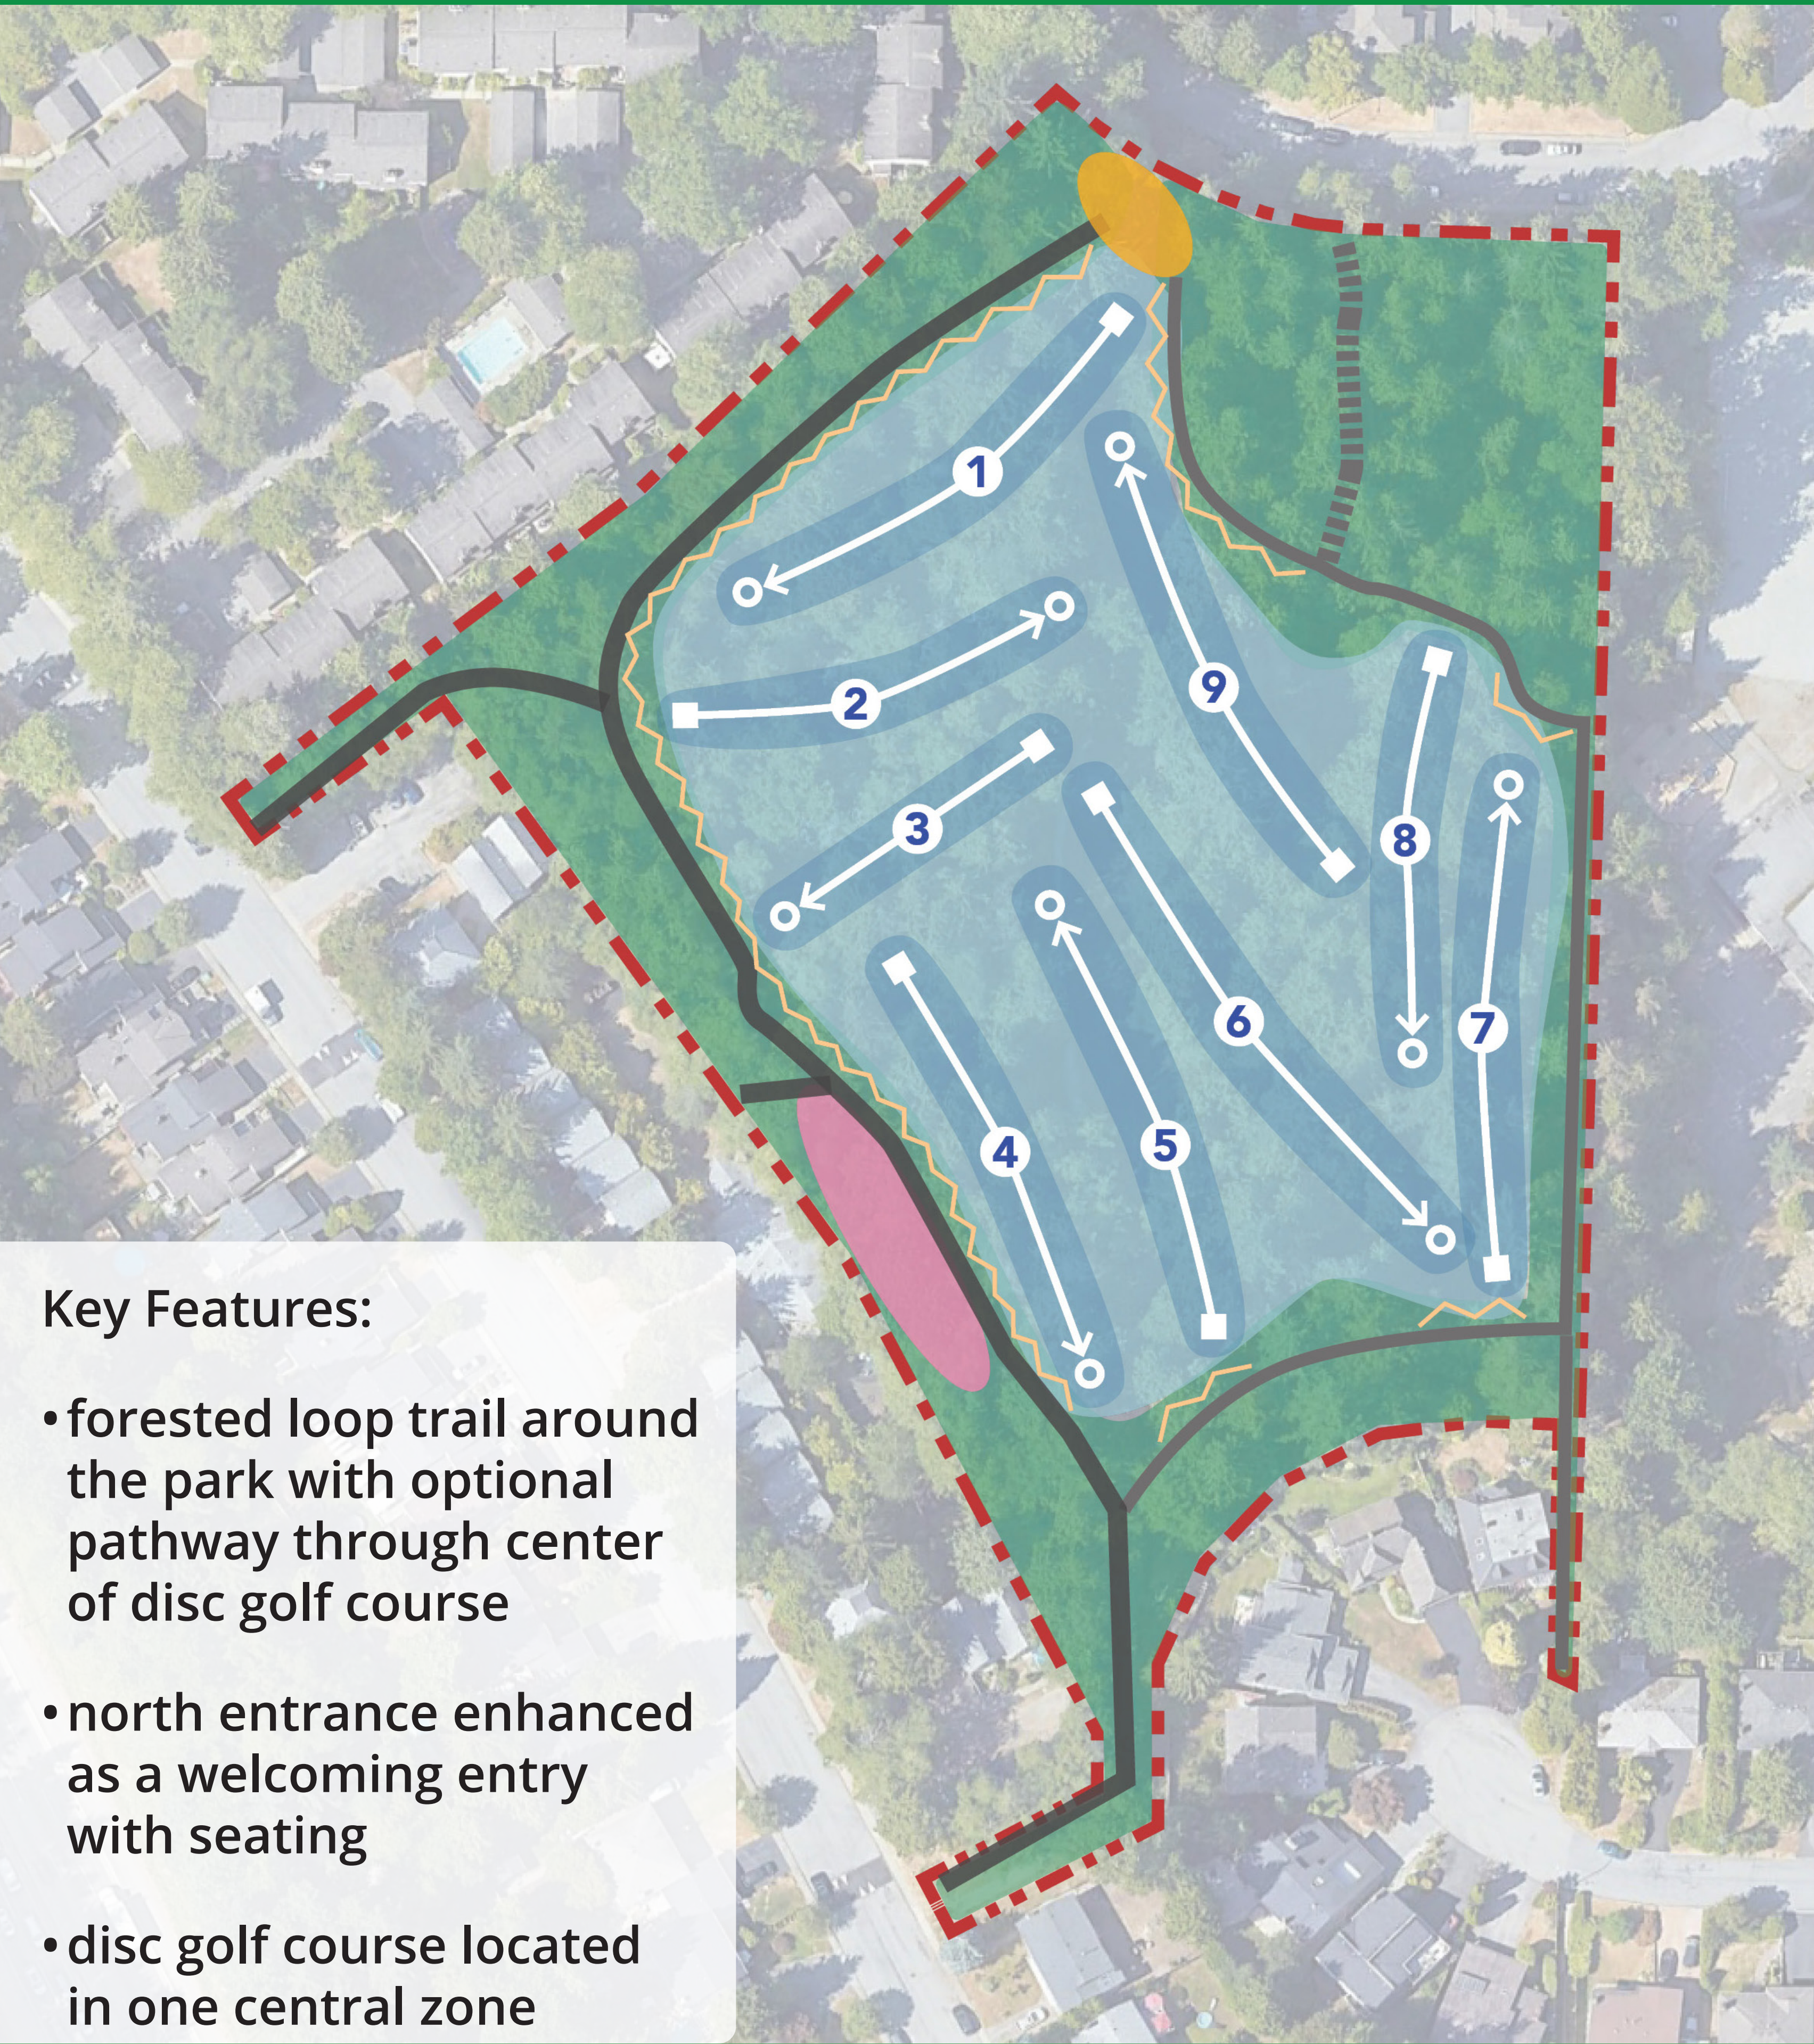

EASTVIEW PARK IMPROVEMENTS

PROVIDE FEEDBACK: LOOP

What do you like about the Loop?

What don't you like?

Key Features:

- forested loop trail around the park with optional pathway through center of disc golf course
- north entrance enhanced as a welcoming entry with seating
- disc golf course located in one central zone

EASTVIEW PARK IMPROVEMENTS

OTHER PARK IMPROVEMENTS

Additional accessible seating and opportunities for rest

Small gathering area at the entrance (Loop) or at the central clearing (Hub) with accessible seating

Family friendly course for new and intermediate players

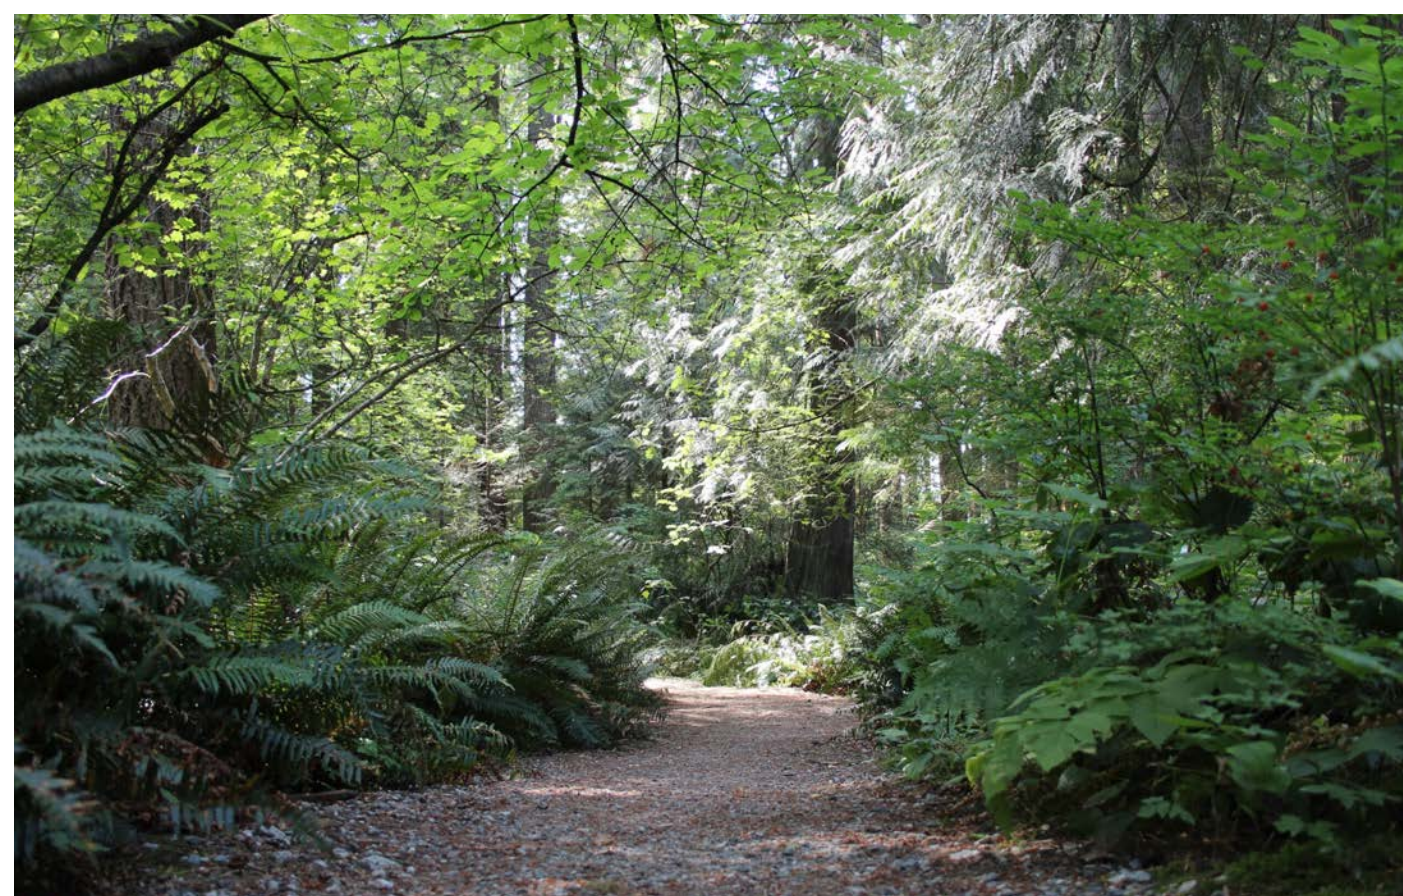

Pocket planting and restoration using on site logs create barriers

Accessible walking trails and split rail fencing to provide separation

Signage at tee pads

Native species restoration and planted buffers

Distinct disc golf entry with course map and code of conduct

Disc golf course highlights the natural obstacles of existing trees

What other improvements would you like to see?
